

## Guest Editorial

### *Sustainable Practices of Circular Economy in Operations Management*

Because a multifaceted aspect of research allows us to answer critical queries and address broad issues; studying associative and collaborative fields is the need of hour. Therefore, the theme of this Special Issue was kept as “*Sustainable Practices of Circular Economy in Operations Management*”. After circulating the “Call for Papers” worldwide, the nine articles (**from page numbers 1013 to 1139**) in this special issue have been selected based on the technical quality of the work and their innovative approach.

The editors would like to acknowledge the help of all the people involved in this project and, more specifically, to the authors and reviewers that took part in the review process. Without their support, this special issue would not have become a reality. In particular, we would like to thank **Prof. Jose Arturo Garza-Reyes, Dr. Sachin Kumar Mangla** and **Prof. Sunil Luthra**. We would like to thank each one of the authors for their contributions. The editors wish to acknowledge the valuable contributions of the reviewers regarding the improvement of quality, coherence, and content presentation of the articles.

We are grateful to all members of *International Journal of Mathematical, Engineering and Management Sciences* for their assistance and timely motivation in producing this special issue. We hope the readers will share our excitement with this important scientific contribution the body of knowledge about various applications of Circular Economy for the Management of Operations.

Last but not the least we would like to thank **Prof. Mangey Ram** (Editor-in-Chief) for bringing out this special issue and all the researchers across the globe who have contributed for this issue.
